

WHAT IS THE APY THERAPY?

HEALTH CARE AND HEALING WITH BEE PRODUCTS

1 ROYAL JELLY

is milky substance which is produced by worker bees. The queen bee feeds on royal jelly all her life.

2 PROPOLIS

is sticky, resinous material which the bees collect from plant buds and other plant parts.

3

POLLEN

is transported from flower to flower by bees to pollinate the plants.

4

BEE VENOM

is produced by bees. The bees use their stings to deliver this substance into the body of their "prey".

5

HONEY

is the product which is obtained from the nectar of flowers. It is mixed with their glandular secretions.

6

BEE SWAX

is used as the main building material in the construction of honeycombs.
