

# NATO'S ANTI-HYBRID STRATEGY

## PREPAREDNESS

This is a preventive step at the lowest level of potential crises.

It can affect critical infrastructure protection, strategic communications, cyber defense and energy security.

DEVICE :

Hybrid trainings, exercises. Preventive steps, soft tools.

3 pillars – conflict escalation levels:

## DETERRENCE

There is already a real chance of a military conflict unfolding here.

DEVICE:

Defense abilities and their psychological deterrent effect are in focus.

## DEFENCE

At this point, NATO's traditional collective defense function comes into play.

DEVICE:

It protects allied member states from external threats through combatant military force.
